

Kevlar multi conductor cable

Shielded polyurethane jacketed underwater cable

Sea & Sun
Technology

Rugged multicore cable for continuous underwater use in fresh- or seawater. The Jacket is made out of very abrasion and cut through resistant polyurethane. The four conductor cable can be used for simultaneous supply and data communication e.g. via RS-232 or RS-485 used for the electrical connection of oceanographic or limnological water measurement devices.

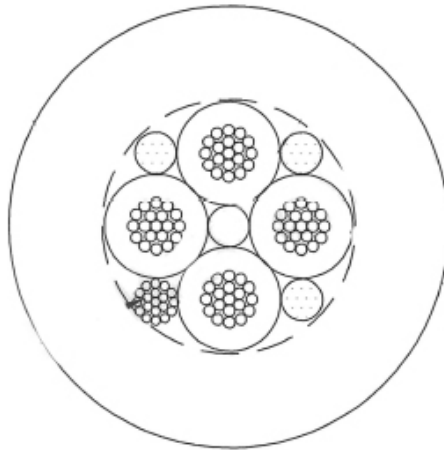

Among other things, the cable is suitable for use in conjunction with the Sea & Sun Technology standard or Bluetooth Cable Drum.

Kevlar multi conductor cable

Shielded polyurethane jacketed underwater cable

Sea & Sun
Technology

Overall diameter	4.72 mm (± 20 mm)
Weight of cable in air	approx. 30 kg/km
Weight of cable in seawater	approx. 12 kg/km
Operating temperature range	-20... 70°C
Storage temperature range	-40... 90°C
Operating strength	133 N
Breaking strength	800 N
Minimum bend radius	64 mm
