Sea & Sun DataWatch

more convenient

Sea & Sun
Technology

- The Sea & Sun DataWatch is the tiniest and perhaps smartest device to control and download the data from any Sea & Sun Technology's probe.
- Using the Bluetooth cable drum for the probe connection frees any researcher or metrologist from carrying a laptop or ragtop around on board.
- With the Bluetooth connection the data from the probe is immediately uploaded to the flash storage on the Sea & Sun DataWatch and can be connected to any Windows computer later.
- The Sea & Sun DataWatch is much cheaper than any computer, is water proof and has 4 GB of Flash Memory. Enough for years of data storage for any probe and any sensor from Sea & Sun Technology.

Sea & Sun
Technology

Multi-conductor cable

Sea & Sun DataWatch

- Waterproof SONY SmartWatch 3 SWR50 (IP68)
- GPS, compass
- Android Wear®
- Sea & Sun DataWatch App
- 1.6 inch TFT Display
- 1.2 GHz, Quard-core ARM
- 512 MB RAM, 4GB flash memory
- Bluetooth® 4.0, Wi-Fi, NFC

Bluetooth Cable Drum

- Cable Drum with Bluetooth (IP64)
- Cable length -150/ 250 m.
- Weight - 3,3 kg.
- Bluetooth® 4.0
- Internal accumulator for powering the probe

CTD 48 (M) *

- Online and memory Probe
- Titanium housing
- Weight - 1,5 kg
- SUBCONN MCBH5M / MCBH8M
- Standard Sensors: conductivity, temperature, pressure
- Additional Sensors: oxygen, turbidity, pH, Redox

* It is possible to use the Sea & Sun DataWatch with all Probes of Sea & Sun Technology GmbH.
